

Belkin Secure KVM Remote Controls

Secure. Certified. Connected.

Belkin Secure KVM Remote Controls are designed to help declutter the operator's desk while increasing situational awareness and effectiveness. An out-of-reach Secure KVM may be installed under a desk or in a cabinet, limiting an operator's access to the buttons for viewing and selecting the active hosts. The Belkin Secure KVM Remote Control provides operators access to the SKVM at the desktop. It mimics the front panel of the SKVM, with a clear, visible parallel to show operators the enclave they are working in.

Currently, users have the option to apply a port label to each button to designate colors for different ports. With the new SKVM Remote Control, LED lights mimic the KVM front panel, so colors are automatically coordinated accordingly.

Belkin Remote Controls offer:

- Illuminated push buttons mirroring the SKVM front panel for easy and intuitive control
- Situational awareness: Clear indication of the active channel reduces operator errors
- Easy placement at the desktop to optimize user experience
- Cascade (or daisy-chain) feature:
 - Available on 4- and 8-port models
 - Allows operators to pair a standard SKVM 4- or 8-Port Remote Control with DuoClave or MultiClave Remote Controls to enable host selection on each display
- Tamper-evident label: Holographic tamper-evident label shows if the enclosure was tampered with
- TAA-compliant: Assembled in the USA; U.S.-based technical support; secure packaging ensures integrity from factory to user site

Choose the model that suits you best.

Secure KVM Remote Control Series

F1DN-KVM-REM2

Secure KVM Remote Control 2-Port

Integrates with Belkin Universal 2nd Generation, Universal DisplayPort and Modular SKVM/SKMs (Modulars require available adapter)

F1DN-KVM-REM4

Secure KVM Remote Control 4-Port

Integrates with Belkin Universal 2nd Generation, Universal DisplayPort and Modular SKVM/SKMs (Modulars require available adapter)

F1DN-KVM-REM8

Secure KVM Remote Control 8-Port

Integrates with Belkin Universal 2nd Generation, Universal DisplayPort and Modular SKVM/SKMs (Modulars require available adapter)

F1DN-KVM-REM4DC

DuoClave Secure KVM Remote Control 4-Port

Integrates with Belkin Universal DisplayPort DuoClave Secure KVM series

F1DN-KVM-REM8DC

DuoClave Secure KVM Remote Control 8-Port

Integrates with Belkin Universal DisplayPort DuoClave Secure KVM series

F1DN-KVM-REM4MC

MultiClave Secure KVM Remote Control 4-Port

Integrates with Belkin Universal DisplayPort MultiClave Secure KVM series

F1DN-KVM-REM8MC

MultiClave Secure KVM Remote Control 8-Port

Integrates with Belkin Universal DisplayPort MultiClave Secure KVM series
